Select CookieWipe folder

Pin Ant icon , you will see cookies count
Before

The screenshot shows the CookieWipe browser extension interface. At the top, the extension is named "CookieWipe" and is marked as "Enabled" with a green toggle switch. Below this, a large blue number "10" indicates the number of cookies on the current site, "www.tomshardware.com". A blue button labeled "NEUTRAL" is next to the site name. The interface is divided into two main sections: "Blacklist Cleanup Mode" and "Whitelisted Domains". In the "Blacklist Cleanup Mode" section, there are two radio button options: "Immediate" (selected) and "On Tab Close". Below these is a checkbox for "Retain site preferences (theme, language, etc.)". A red button labeled "Delete Cookies Now" is positioned below the checkboxes. The "Whitelisted Domains" section has a header "Whitelisted Domains" and a sub-header "Cookies from these domains will be kept when tabs close". It features a text input field containing "example.com or *.exar" and a blue "Add" button. Below the input field is a grey button labeled "Add Current Domain". At the bottom of the "Whitelisted Domains" section, it says "No whitelisted domains". The interface is styled with a purple header, a light blue background, and various buttons in blue, red, and grey.

CookieWipe **Enabled**

10
Cookies on this site
www.tomshardware.com **NEUTRAL**

Blacklist Cleanup Mode

☒ **Immediate**
Block cookies as they're set

☐ **On Tab Close**
Delete cookies when tab closes

☐ Retain site preferences (theme, language, etc.)
